# Satellite Based Fires Products: Method, Data Access, and Applications

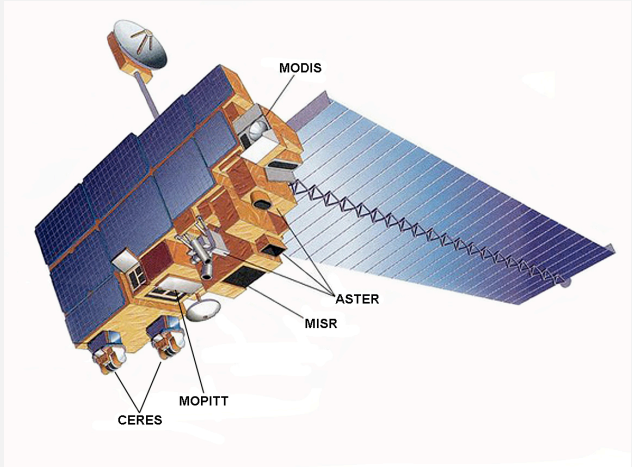
Pawan Gupta & ARSET Land Team

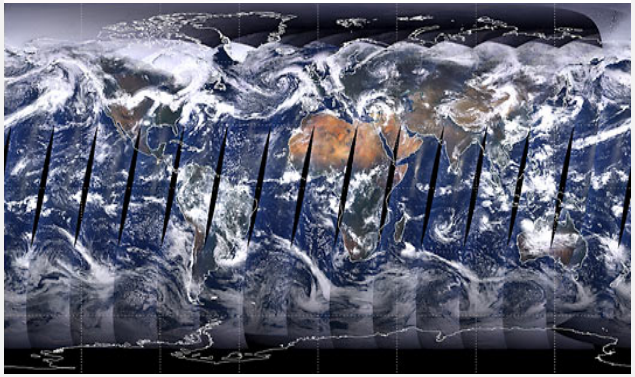
**Satellite Remote Sensing of Air Quality: Data, Tools, and Applications**

Tuesday, May 23, 2017 – Friday, May 26, 2017
Indian Institute of Tropical Meteorology, Pune, India

# MODIS

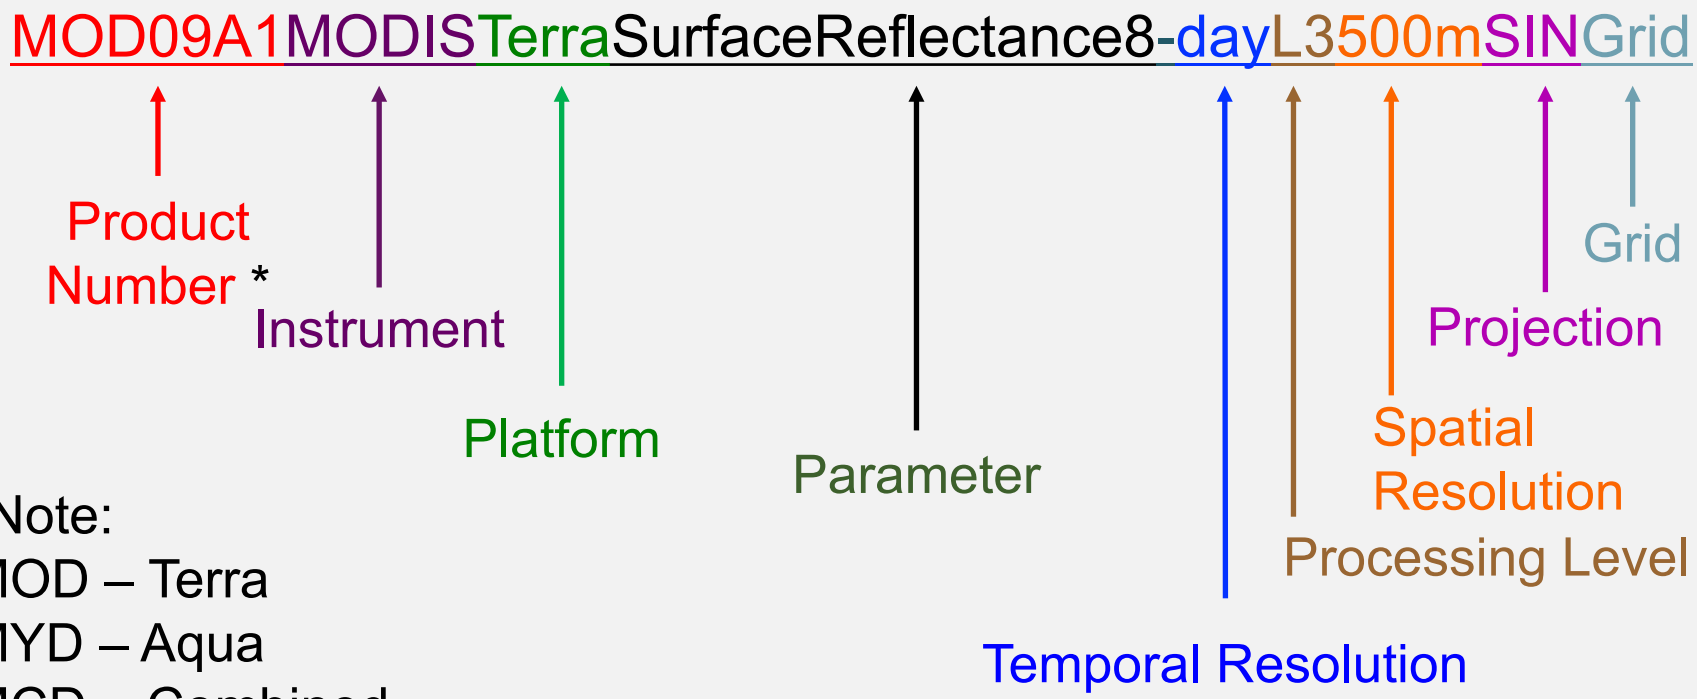
- Spatial Resolution
  - 250 m, 500 m, 1 km
- Temporal Resolution
  - Daily, 8 day, 16 day, monthly, quarterly, yearly
  - 2000–present
- Data Format
  - Hierarchal data format – Earth Observing System Format (HDF–EO8)
- Spectral Coverage
  - 36 bands (major bands include red, blue, IR, NIR, MIR)
    - Bands 1-2: 250 m
    - Bands 3-7: 500 m
    - Bands 8-36: 1000 m





# MODIS Naming Convention

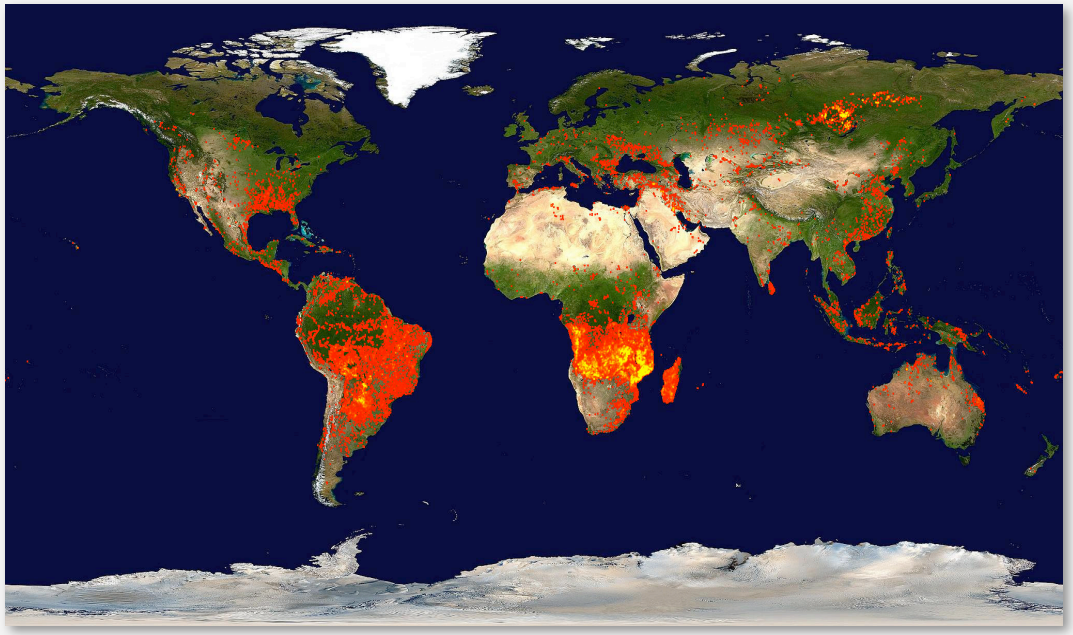
MODIS file names follow a naming convention that gives useful information regarding the specific product. For example:



*Note:
MOD – Terra
MYD – Aqua
MCD – Combined

# MODIS Fire Products

- Near Real-Time Thermal Anomalies and Fire Locations
- Provides snapshots of active burning fires and burned areas
- The Active Fire product delivers actively burning locations on a daily basis at
  1 km resolution (additional 8 day and monthly products)



**Global Fire Map**
**(September 17 – 26, 2016)**

Colors range from red, where the fire count is low, to yellow where the number of fires is large

# MODIS Fire Detection Algorithm

http://modis-fire.umd.edu/files/atbd_mod14.pdf

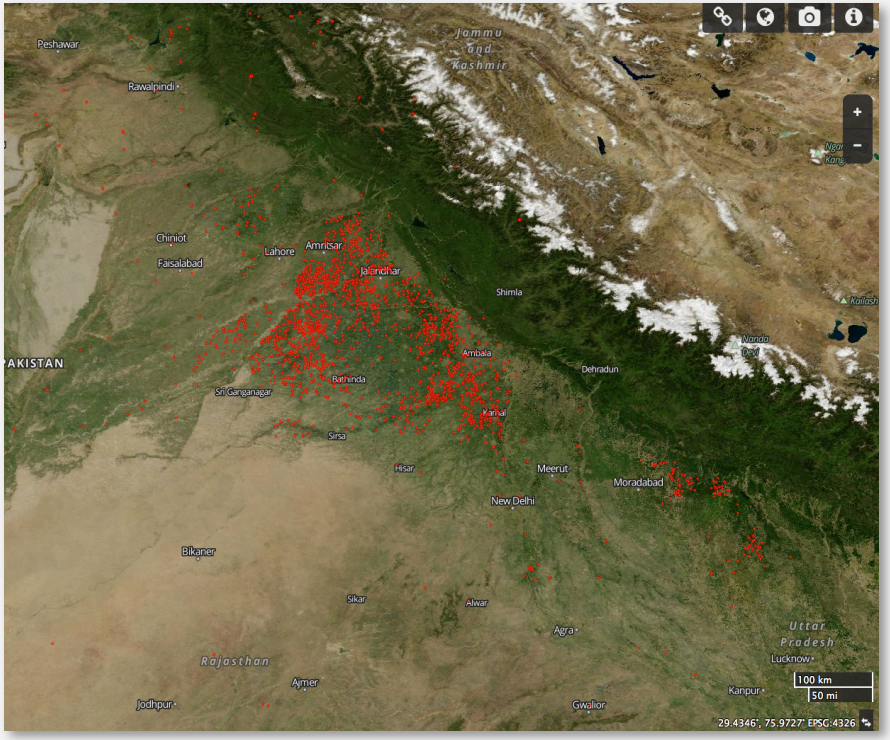
*Table 2: MODIS channels used for active-fire detection and characterization.*

| Channel | Central wavelength (μm) | Purpose |
|---|---|---|
| 1 | 0.65 | Sun glint and coastal false alarm rejection; cloud masking. |
| 2 | 0.86 | Bright surface, sun glint, and coastal false alarm rejection; cloud masking. |
| 7 | 2.1 | Sun glint and coastal false alarm rejection. |
| 21 | 3.96 | High-range channel for fire detection and characterization. |
| 22 | 3.96 | Low-range channel for fire detection and characterization. |
| 31 | 11.0 | Fire detection, cloud masking. |
| 32 | 12.0 | Cloud masking. |

- Potential fire pixel identified
  - BT4 > 310 K
  - BT4-11 > 10 K
  - 0.86 micro reflectance < 0.3
- Otherwise flagged as non-fire pixel

# MODIS Thermal Anomalies Algorithm

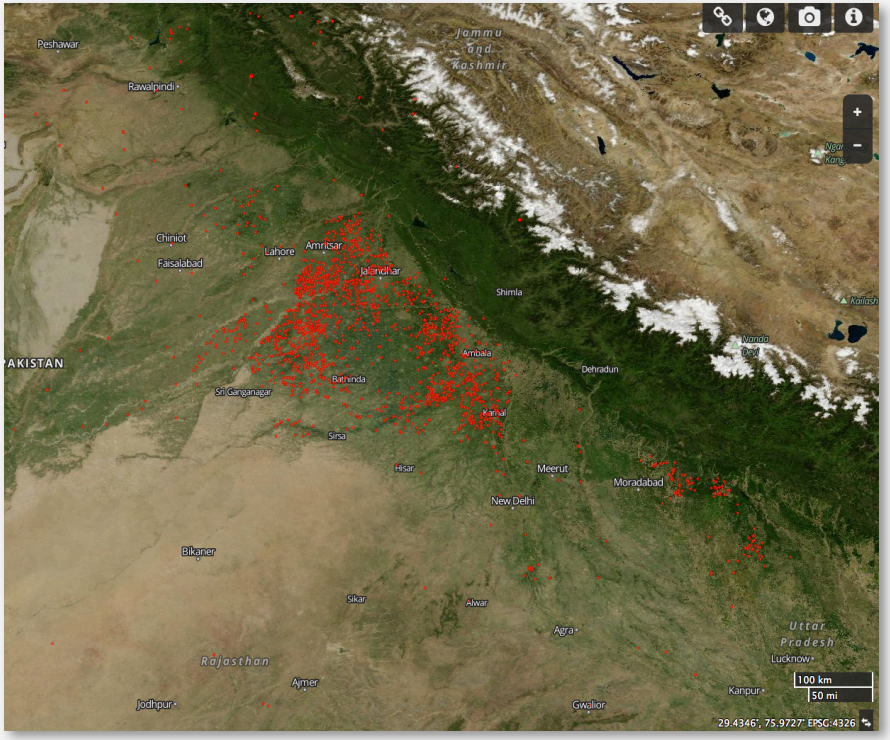
- Limitations
  - False positives: small forest clearings (bare soil)
  - Large fire omissions due thick smoke
- Collection 6 (most recent) improves upon these errors
  - Global commission error of 1.2%



MODIS fire detections, NASA Worldview

# MODIS Thermal Anomalies Algorithm

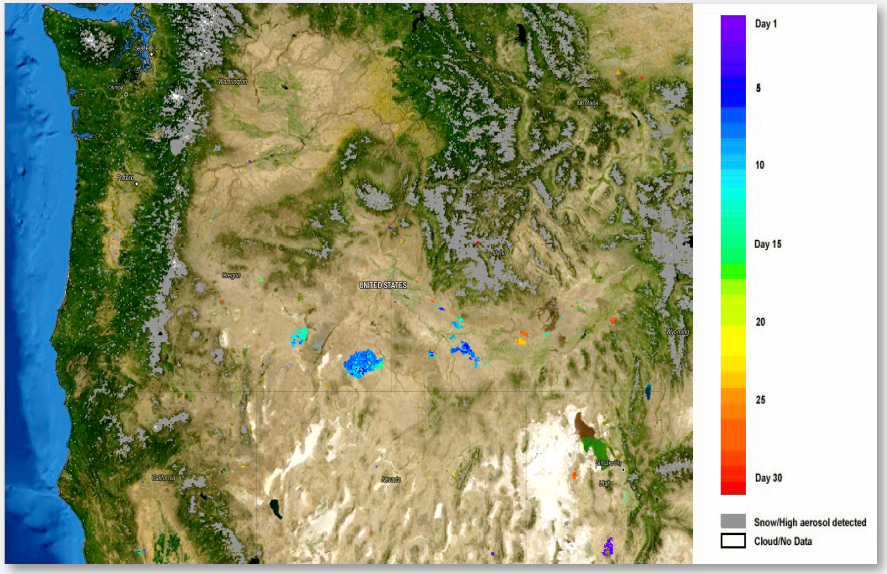
- MODIS Fire Detection:
  - 1 km pixel flagged as containing one or more fires
  - can also detect volcanic signatures
- Significant increase in absolute radiance at 4 μm (band 22) and 11 μm (band 31)
  - cloud masks applied
  - VIIRS active fire detection algorithm is similar



MODIS fire detections, NASA Worldview

# MODIS Land Products: Burned Area (MCD45A1)

- The combined Terra & Aqua MODIS Burned Area Product is a monthly gridded 500m product
- MODIS detects the approximate date of burning at 500m resolution
- Maps include the spatial extent of recent fires
- For more information: http://modis-fire.umd.edu



This image shows the extent of the Long Draw fire that occurred in southeastern Oregon
The colors represent the approximate day of the burning from July 8 (start of fire) to July 12, 2012 (end of fire)

# Where to Obtain MODIS Products

Land Process Distributed Active Archive (LPDAAC) http://lpdaac.usgs.gov/

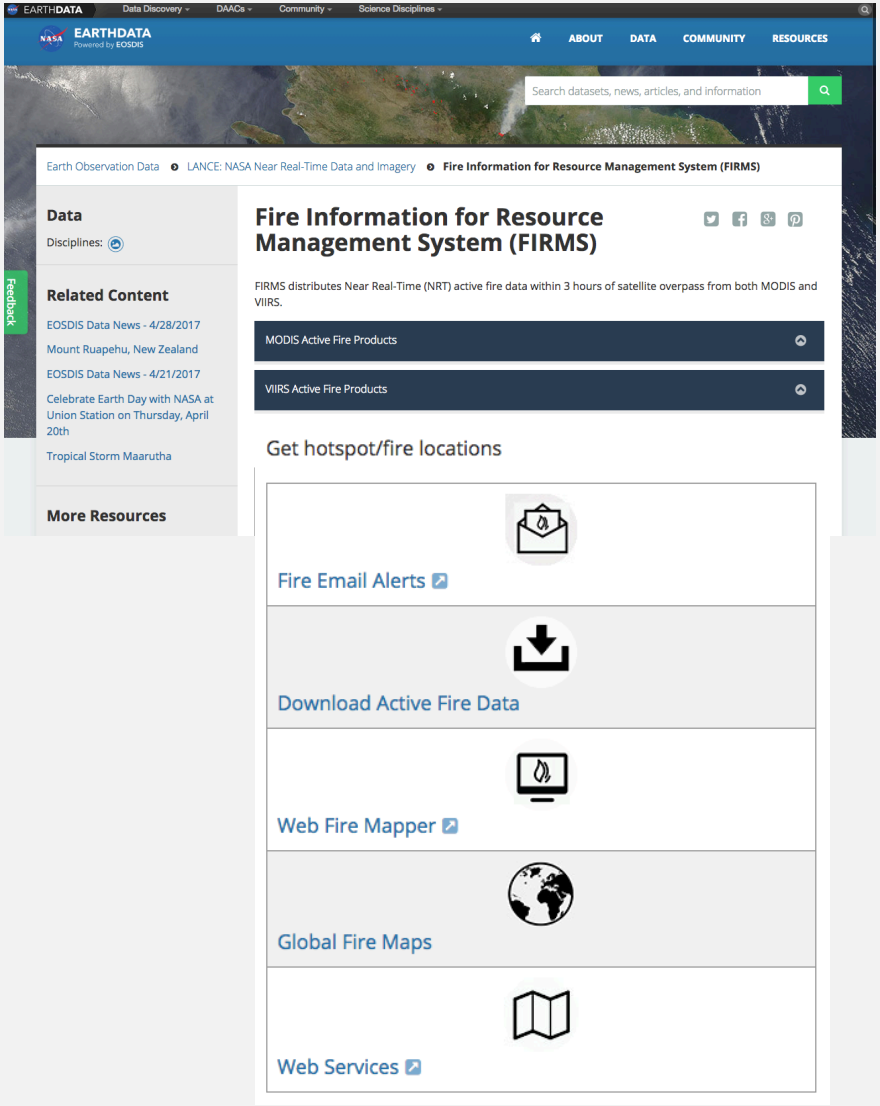
ECHO Reverb: http://reverb.echo.nasa.gov

Worldview: http://worldview.earthdata.nasa.gov

Fire Information for Resource Management System: http://earthdata.nasa.gov/earth-observation-data/near-real-time/firms

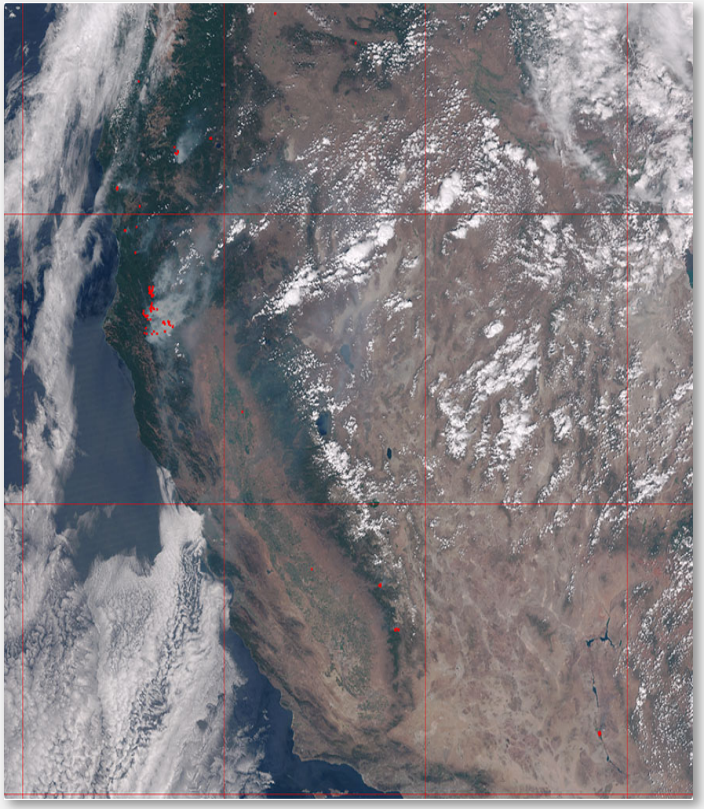
# Fire Information for Resource Management System (FIRMS)

- Near real-time (NRT) active fire data within 3 hrs of satellite overpass
- Global MODIS and VIIRS hotspots, fire locations, and burned area images
- Historical data available
- Available in:
  - Email alerts
  - GIS-friendly file format
  - Visualization in Web Fire Mapper or Worldview



# VIIRS Active Fire Product

- Released October 22, 2012
- Spatial resolution:
  - 750 m (M-band)
  - 375 m (I-band)
- Data still preliminary and continually undergo evaluation & calibration
- Data available as:
  - ASCII
  - KMZ
  - TIFF
- Exercise on this tool in upcoming session



Northern California Fires, 2015
